

Project Manager

Description

Escher Group is a global software company delivering point of service solutions that are transforming how government/public sector agencies engage and interact with their customers/citizens. We strive to lead in the creation and development of point of service solutions for some of the largest government/public sector information networks across the globe.

Headquartered in Dublin and with 5 offices around the world, Escher Group Limited was registered in 1989 and was listed on London's AIM in 2011. Our customer base spans over 35 countries across the globe and is in over 70,000 business locations where our customers serve approximately 1 billion people worldwide. Escher's innovative and patented technology is rapidly changing the landscape of social and omni-channel retail.

We are currently recruiting for a **Project Manager** to oversee the implementation of Escher Group's software in client projects. This individual will be delivering software development projects and using appropriate project management methodologies in a controlled, timely and cost-effective manner, for multiple simultaneous client implementations.

Location: Dublin City Centre

Duties and Responsibilities

- Developing cohesive, detailed and costed project plans, controlling project resources including budgets and Project Management actions.
- Client Facing - working directly with our Customers and attending PM meetings and Steering Groups.
- Liaising with both Clients & internal groups and reporting on all aspects of on-going projects.
- Developing, defining and maintaining appropriate PM processes and procedures relevant to the project delivery.
- Reporting any issues immediately, with good timely project progress reporting.
- Highlighting any "Scope Creep" or extra work streams or variances to project workflows immediately. Look closely at the project to uncover any risks that may affect the delivery of project.
- Ensuring appropriate Software QA activities are tabled and actioned to ensure a quality product is delivered to specification.
- Forecasting project deliverables monthly.
- Developing, monitoring & reporting on Project KPI's and SLA's

- Liaison with all teams and internal admin for Project Billing monthly.
- Working closely with internal teams, to ensure all strands of the Projects are in sequence and aligned with the overall strategy.

Experience

- 5-7 years' experience of project management
- Must have experience in successful delivery of Projects, on-time and to-budget.
- An ability to measure successful project deliverables.
- Experience with software development methodologies and processes
- Proven ability to manage dispersed teams
- Broad understanding of recognised project management methodologies.
- A good understanding of Agile Methodologies and the controls required.

Qualifications

- Certification in recognised project management discipline

Person Specification

- Proactive, self-starter with strong motivation, who works on own initiative
- Strong influencing skills with the ability to lead and motivate a successful team
- Excellent communication and interpersonal skills
- An ability to develop strong relationships with internal and external clients.
- Willingness to travel
- Good work standards and structured methodologies.
- Detailed planning and control skills.
